

## Object supports

Object supports are an important part of any exhibit. Whether the object is disappearing in a busy display, at the wrong height or large and unstable, the correct support will optimise the visual impact of your display and ensure safety and integrity for your object.

Pod has designed and installed mounts for exhibitions with major institutions both here in Australia and New Zealand.

All Pod mounts are created with the safety of the object in mind, and the aesthetic requirement of the exhibition design. We strive to make the mount disappear, and will not impact unnecessarily on the viewers experience.

All materials used are inert and conservation approved. Our custom object support materials range from stainless steel rod supports, individual stainless steel stands, custom mannequins and body forms, acrylic cradles, hat forms and mounts, book cradles, wet specimens and one off support solutions.

Pod can look after your object support and installation requirements for single objects or entire exhibitions. Please contact us to discuss your specific needs.
